

7th 2-4

* mean

- 1) add up all numbers
- 2) divide by how many numbers you added

ex.) $\underline{3} + \underline{2} + \underline{1} = 6$
 $6 \div 3 = \textcircled{2}$

* median

- 1.) order the numbers from small to big

ex.) 1 $\textcircled{2}$ 3

- 2.) find the Middle number

↑
Median

* mode

- 1.) Which number happens the Most

ex.) 1, 2, 2, 3

$\textcircled{\text{Mode} = 2}$
